- WS\SR\TX\RE\AT\DB

- 1 - Texas Users: The Daily Balancing Report will now use the Additional Grade Level Setup under Federal/State Reporting > Texas State Reporting > Setup > Codes to calculate a student's grade level. This brings this attendance report in line with Student Attendance Accounting Handbook requirements for unfunded PK students to be reported as EE, as is already the case with the Daily Register. Please note that this requires a student to have a GLO of EE in Student Profile's General tab in order to work. Additionally, an option has been added to the report to breakdown totals by Grade or Grade and Grad Year. When run by Grade, GLO EE students will be included with other EE students. When run by Grade and Grad Year, EE students will be broken down by graduation year as well as grade; this will break out the students who are EE by GLO from the regular EE students.

When a budget process work file is being edited (the budget process is in Edited "E" or if a Work File exists, "W" status), two new lines will indicate the total amount of accounts in the work file and the number of those already submitted. If not all accounts are submitted, the Budget Process cannot be moved to Submitted status.

There are a couple of different reasons why not all accounts in a work file would be submitted when a user submits their changes, and there is now information printed on the report created during the Submit process:

1. The user may not have access to all of the accounts – due to account clearance.
 2. There may be uncommitted changes made by users other than the one submitting the budget.
- Or in some instances, both of the above causes prevent the Budget to move to a Submitted status.
