Software Product Release Notes
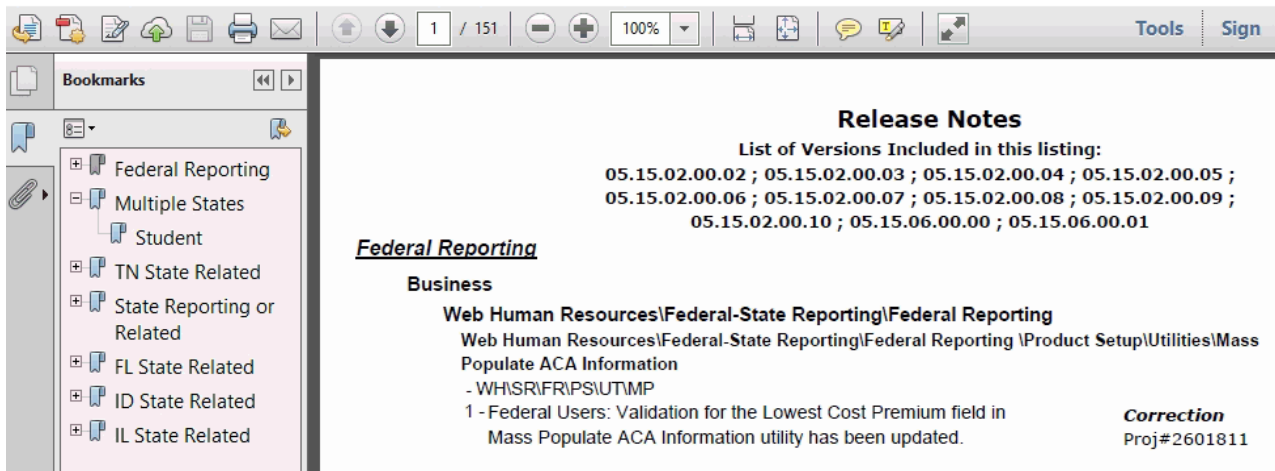

List of Versions Included in this listing:

05.17.10.00.00 ; 05.17.10.00.01 ; 05.17.10.00.02

These release notes are organized into groupings, based on the menu path of the project.
The first level is Federal reporting, State reporting (or related), or General Updates. Within those groupings, notes are divided between Systemwide, Business Systems, and Student Systems. Within those areas, they are divided into module groups (menu paths with similar data areas), then sorted by menu path.

For ease of viewing, and utilization of bookmarks, we recommend downloading and saving this file, then open it with your PDF Viewer, as some browsers may not support viewing of bookmarks (Chrome). In Firefox, you can access the bookmarks by clicking on the Toggle Sidebar icon in the upper left corner of the reading pane.

Once downloaded, to navigate, you should be able to use your pdf reader's bookmarks in the left slider bar. By clicking on the bookmark icon, the bookmarks will display. The actual display may vary depending on your pdf viewer and version.

You can expand an area by clicking on the "+", collapse it by clicking on the "-" to the left of the heading.
You can use the slider bar in the bookmark window to navigate and select any section to view it.
Depending on your PDF Reader, you may be able to select the area, right mouse click, and print that section in one action.

Obsolete CASE-related fields will no longer be extracted or displayed in PEIMS Maintain. Crisis Code 05 has had it's long description updated. OnRamps will now extract for Course Transcript files. And most 2018 Business Rule updates have been completed, as well.	*Enhancement* Proj#3499339
3 -	Texas Users: Several of the reporting requirement changes for 2018 have been completed with this update. Correction
Proj#3469029

2 - Texas Users: The PEIMS process has been updated to include the Crisis Submission. This is to fulfill the crisis-specific submission requirement for the 2018 school year. It works similarly to other PEIMS Submissions, reporting only those interchanges and complexes as required. PLEASE NOTE: 1) The EdOrg interchange is only needed to be exported the first time the data is sent to the state, or if the data changes. After the first upload, please remember to uncheck the EdOrg file in the TSDS PEIMS Export template. 2) Please ensure the CASE Choice fields in Entity Year Setup are blank, or they will be included in the XML. 3) As students are only intended to be reported one time, we set a flag on their record once the XML file is created to ensure they are not reported again. There is not a way to export them again, so please make sure you do not create the XML files until you have verified the data is correct in PEIMS Maintain. If a file is exported and then not sent to TEA, those records cannot be re-exported in Skyward at this time. 4) The filename will need to be updated to match Summer 1 requirements. This means that you will need to remove the interchanges from the zip file and edit each file's name to add "SUMR1" immediately after the 2018. We apologize for the inconvenience and will be correcting this in a future update as soon as possible. Please also note that Crisis Code 06 students will not be included at this time, but we will update the submission to include them in a future update as well.

- WH\AD\NH\PS\CF

1 - A Screener Access configuration has been added to FastTrack. This configuration allows the district to inactivate employees as FastTrack screeners so that that they no longer have access to past applications.

It is important to note that:
1. Existing screeners will already be set as active screeners.
2. Adding new screeners will require an additional step of editing their Screener Access and selecting the Active Screener option.
3. Inactivating a screener does not automatically remove them from any Screener Groups or positions.

The Screener Access can be used to address two scenarios:
1. The screener is no longer employed with the district, and still has access to Employee Access, but should no longer have access to any applications to which that they may have previously had access.
2. The screener has changed positions, and may still be a screener, but they should no longer have access to the applications to which they previously had access.
