1 - Texas Users: In response to notification from districts regarding the use of STAAR EOC Performance Level and Score reporting for students with a Score Code other than S, we have added a setup option to allow districts to choose whether or not to include these test results on AARs. If your district chooses not to report STAAR EOC data on AARs when the student received a code other than S for their Score Code, please take the following steps:
1. In Test Builder, at WS\OF\CA\TS\TB, expand a STAAR EOC test and then expand the EOC Summary Setup section.
2. For EOC Summary Mode, select Score.
3. Edit the Score Code Location.
4. Under the Scores area of Test Score Information, find "Score Code" and select it; then Save.
Once these steps have been completed for each STAAR EOC test, Skyward will display the test information, along with the Score Code, in the STAAR EOC subtab under Test Scores in Student Profile. However, when AARs are printed, any test that does not have an "S" Score Code will not be used to populate STAAR EOC test information, regardless of the score or performance level achieved. This will ensure that any student caught cheating on a test will not have information from that test included in their AAR.

**Web Student Management\Federal-State Reporting\Texas State Reporting\Texas Student Data System (TSDS)\TSDS Unique ID**

 **-** WS\SR\TX\TS\TU

1 - Texas Users: The TSDS Enrollment Events process has been added to TSDS. This is a new process that will replace PET exports once TEA accepts TSDS Unique ID Version 3 data files on 4/2/18. Here is a basic explanation for how it will work.
1. From 000, navigate to WS\SR\TX\TS\TU and click TSDS Enrollment Events Processing.
2. Verify the School Year is current and the Output Type is Extract, then click Run.
3. Optionally, click "Extract and Export" in order to directly create the text file, and skip to step 6 in these instructions.
4. After extraction, data will be available to be reviewed in TSDS Enrollment Events Maintain. Note: data here is listed by Transmission, where each new extract/export is a new Transmission. Data in the Maintain may be edited, but only to add or remove the new Entry/Exit Verified flag.
5. After review, return to TSDS Enrollment Events Processing and change the Output Type to Export, then Run.
6. Go to View Exported Files/Save Locally for Submission, and select the record recently created. Click the View button to download to your computer.
More information on how this process works will soon be available in written format, as well as via live/recorded webinar.

Special note: As TEA has indicated that only changed information should be included in the files, once the Export option is used, student records encompassed by that specific Transmission will not be extracted again; please do not use Export until ready to upload. Extractions may be repeated as needed, at any time, up until the Export option is used. After an Export file has been created, only student record changes that occur after the last Export will be extracted.

Also, please note that a start date specific to 2018 has been hard-coded into Skyward - 3/12/18. Only student record changes as of this date will be included in the extraction process in order to ensure that records previously reported via PET will not be included in the new process. If the district requires an earlier date than 3/12/18, please create a service call for assistance.

The TSDS Unique ID process will continue as it currently works, up until 4/2 when it will automatically begin using the new file specifications; no changes will be required on the district end for this transition.
